

IGF 2021  
Lightning Talk #43  
Creative strategies to tackle the  
intersection between digital  
technologies and the climate  
emergency

To understand and document the relationships between technology and the climate and ecological crisis we live in today.

Gato.Earth proved us wrong

## Drought-stricken communities push back against data centers

As cash-strapped cities welcome Big Tech to build hundreds of million-dollar data centers in their backyards, critics question the environmental cost.

## Preocupación por impacto que produciría extracción de tierras raras en Penco

Vecinos de la comuna esperan llevar a cabo una consulta ciudadana para evitar que iniciativa se lleve a cabo en la zona. SEA debe evaluar observaciones.
